Please note:

People lists

Names are listed alphabetically. Residential postcodes have been aligned with diocesan boundaries wherever feasible, though a small margin of error may exist; any impact is considered negligible.

Some signatories worship outside the diocese in which they reside.

Churches list

Churches are grouped by frequency, with those most represented appearing first. Without exception churches listed in the lowest band for each diocese were named only once. Efforts have been made to collate duplicates and also indicate where multiple churches are being referenced.

There are churches listed under dioceses to which they don't 'belong', this is a result of the filtering and collation being based on residential postcodes.

We encourage particular awareness some signatories are members of churches belonging to conservative networks, including people from HTB network churches, churches involved with New Wine, and churches under additional episcopal oversight. This demonstrates that such churches are not as theologically homogenous as is often portrayed. Recognising this diversity is essential for good pastoral practice and for understanding the lived experience of local congregations.

A number of signatories have taken considerable personal risk in coming forward. Part of the purpose of the Open Letter was to give voice to those often unheard and overlooked. When individuals chose to name their church, we have respected that choice. A church appearing on the list must not be assumed to be fully affirming; the opposite may be true.

We encourage all engaging with the Open Letter to read the 'Summary Report' in conjunction with the following lists, and to approach the data with these nuances in mind.
